

Delete annotation

This API is responsible for soft deleting an annotation.

[DELETE]/api/v1/annotations/{id}

Response: The id of the deleted annotation.

Header

Header used on this API are those taken from [header standards of TS Digital](#).

Content-type is accepted in application/json

Query Parameters

Parameters used to make a successful request.

- **id:** Unique identifier associated with the annotation to be deleted. (**required**)

Body

No body is needed to make this request.

Response

On successful response

If successful, the **API** responds with HTTP code **200(OK)** with the following body:

```
{
  "id": "string"
}
```

- **id:** the unique identifier of the deleted annotation

On error response

In the event of an error, the **API** responds with a body **JSON** with the following format:

```
{
  "code": "string",
  "timestamp": "2022-10-28T13:01:00.754Z",
  "message": "string",
  "subErrors": [
    {}
  ]
}
```

- **code**: A string representation of the HTTP error code, linked with the returned http error
- **timestamp**: Date and time of the answer, expressed as a string.
- **message**: Message expressing error.

Possible errors are:

- **400**: The request is malformed (parameters with incorrect format, invalid or inconsistent parameters).
- **401**: An authorization token has not been provided or the authorization token provided is invalid (eg: it has expired).
- **403**: The provided token is valid, but the user is not authorized to perform the operation.
- **404**: No annotation found with the given id.
- **500**: An unexpected error occurred.
