

Retrieve Security Environment Files

This API is responsible for retrieving all files associated to a unique Security Environment.

```
[GET]/api/v1/{itemId}/intermediary/{taxId}/security-environment/{siteCode}/{version}
```

```
[GET]/api/v1/{itemId}/intermediary/{taxId}/security-environment/{siteCode}
```

version parameter is optional.

Response: List of Security Environment files.

Header

Header used on this API are those taken from [header standards of TS Digital](#).

Content-type is accepted in application/json

Query Parameters

Parameters used to make a successful request.

- **itemId**: Unique personal identification of the item associated with Security Environments requested. Mandatory for personal or technical users .(**required**)
- **taxId**: Unique fiscal code of the item associated with Security Environments requested. (**required**)
- **siteCode**: (**required**)
- **version**: Current version of the Security Environment Version. (**optional**)

Body

No body is needed to make this request.

Response

On successful response

If successful, the **API** responds with HTTP code **200(OK)** with the following body:

```
[
  {
    "name": "string",
    "content": "string"
  }
]
```

- **name:** Name of the file.
- **content:** Content of the file encrypted on Base64.

On error response

In the event of an error, the **API** responds with a body **JSON** with the following format:

```
{
  "code": "string",
  "timestamp": "2022-05-05T12:46:42.016Z",
  "message": "string",
  "subErrors": [
    {}
  ]
}
```

- **code:** A string representation of the HTTP error code, linked with the returned http error
- **timestamp:** Date and time of the answer, expressed as a string.
- **message:** Message expressing error.

Possible errors are:

- **400:** The request is malformed (parameters with incorrect format, invalid or inconsistent parameters).
- **401:** An authorization token has not been provided or the authorization token provided is invalid (eg: it has expired).
- **403:** The provided token is valid, but the user is not authorized to perform the operation.
- **500:** An unexpected error occurred.
